

**Ocean Beach Bike Path/Hotel Circle North Bikeway Project**  
**CIP # 58-156.0**

**Project Description:**

The Ocean Beach / Hotel Circle North Bikeway project will extend the existing Ocean Beach bike path along the north side of Interstate 8 between Ocean Beach and Pacific Coast Highway to the western terminus of Hotel Circle Place (approximately 3,900 feet to the east). The bikeway would provide non-vehicular traffic with a travel route between the Ocean Beach and Old Town areas and the retail centers of the Mission Valley area. The bikeway is to be designed per Caltrans design standards Chapter 1000 as a Class I bike path, with the eastern end designed as a Class III bike route due to the shared use with the baseball field maintenance road.

**Project Issues:**

- Scheduling of the construction activities around the wildlife nesting season.
- Obtaining necessary joint use easements and permits for the bike path facility from other agencies such as Caltrans, Metropolitan Transit Development Board (MTDB), San Diego Northern Railroad (Railroad), and utility companies.
- Use of alternative forms of surfacing for the bike path facility in certain areas of the project that is environmentally safe.
- Obtaining the necessary permits from the resource agencies in a timely manner.

**Next Steps:**

- A) Environmental Review (5/04 - 2/05)
- B) Complete Construction Plans (8/04 – 8/05)
- C) Bidding / Award Process (8/05 – 2/06)
- D) Construction (10/06 – 2-07)

Estimated Project Cost

\$2,000,000
