

EXECUTIVE OFFICER SUMMARY REPORT  
**December 3, 2004**

ITEM: 12

SUBJECT: **GIS MAPS/DATABASE OF SDRC JURISDICTION:  
PARCEL INVENTORY**

The Executive Officer will present an overview of the GIS-based Parcel Inventory information provided by Gregory Smith, County of San Diego Assessor, Recorder, and Clerk.  
*(Deborah Jayne)*

PURPOSE: Information item: inform Board Members and stakeholders about the Conservancy's new Parcel Inventory.

DISCUSSION: Last summer Board Member Jim Bartell and I met with Mr. Gregory Smith, San Diego County Assessor, Recorder and Clerk to request his assistance in obtaining parcel inventory information. Mr. Bartell arranged the meeting.

In response to our request, Mr. Smith has generously provided a GIS-based Parcel Inventory to the Conservancy at no cost. The Inventory consists of the following components, each of which covers the entire 52-mile jurisdiction of the Conservancy:

- Aerial photography with all parcel boundaries;
- Maps with all parcel boundaries and water features;
- Parcel Profile Database containing detailed information on each parcel; and
- Map Books for linking parcels with Parcel Identification Numbers (needed for some areas below El Capitan Reservoir).

This information will serve as the first step in assessing the universe of acquisition opportunities potentially available to the Conservancy and its partners. We are currently exploring ways to keep the information up-to-date.

The Conservancy is enormously grateful to Mr. Smith and staff for this invaluable contribution. The Parcel Inventory

was created specifically for the Conservancy by Mr. Larry Berggren, Mapping Division Chief, and GIS Analysts, Anthony Pocina and Eric Worthington.

LEGAL CONCERNS: None.

FISCAL IMPACT: None.

SUPPORTING  
DOCUMENTS: None.

RECOMMENDATION: Accept report.
